

## Polymer Technologies Has Powerful Solutions in Store This Fall

The crisp smell of autumn is in the air! Even though the holidays are approaching, manufacturing never stops. Imagine how great it would feel to watch projects simply fall into place when you have a dedicated supplier like Polymer Technologies working with you.

We're the experts in solving noise, thermal, vibration, and air and fluid challenges for OEMs. Stocking programs for specific products and parts provide customers with fast turnaround times. See what innovative changes are happening at Polymer Technologies this fall!

### Industry Highlight: Solutions for the Power Generation Industry

Need to power through a tough challenge? No problem. We have the experience and expertise to provide you with high-quality solutions to mitigate excess noise, heat, vibration, and air and fluid transfer issues.

#### Energy Management Solutions

- Vibration and noise control for engine enclosures
- Noise absorption for doors, service hatches, and plenums
- Isolation mounts for generators, engines, and motors
- Low-cost hoses to improve air and fluid transfer

Don't forget to come see us and our solutions in person at POWER-GEN International this December in Orlando, FL!

### Product Highlight: High-Performance Hoses & Molded Rubber Parts

It's been a very wet end of the summer season. If all this rain has you thinking about ways to improve air and liquid transfer in your equipment, we're here to help! Our line of high-performance hoses and molded rubber parts are the solution you've been looking for.

Suitable for a variety of engine applications, including trucks, power generators, and industrial equipment, our high-performance hoses and rubber parts are engineered to meet your needs. From organic hoses, silicone hoses, and custom molded rubber parts, we have a solution that will make air and liquids flow smoothly.

### Open vs. Closed Cell Foam: Understanding Permeability

Depending on your situation, one type of foam may perform better than the other for your requirements. It's not always easy to know what kind of porous plastic foam your application needs though. Thankfully, we've got your back and already whipped up a handy infographic to help you determine the best foam solution for your latest project.
